EDUCATION

Sacred Heart University M.S. in Computer Science & Information Technology GPA: 8.89/10 • Selected Coursework: Advanced Web Development, Data Structures and Algorithms, UX Design, Cloud Computing, Mobile Application Development, Software Engineering	Fairfield, CT 08/2023 - 05/2024
AAR Mahaveer Engineering College (JNTU) B.Tech in Computer Science Engineering GPA: 7.25/10 • Selected Coursework: Object-Oriented Programming, Database Management Systems, Web Technologies, Software Testing, User Experience Design, Human-Computer Interaction	Hyderabad, India 08/2019 - 08/2023

SKILLS

- Programming Languages: JavaScript (ES6+), Python, HTML5, CSS3, SQL
- Frameworks & Libraries: React.js, React Native, Node.js, Express.js, Django, Flask, Bootstrap
- Tools & Technologies: Git/GitHub, RESTful APIs, Responsive Design, Figma, Chrome DevTools, npm/yarn
- Technical Skills: Component Architecture, State Management, API Integration, Cross-Browser Compatibility, Performance Optimization, Agile/Scrum
- Certifications: Google UX Design Professional Certificate, Python Programming Certificate, HubSpot Content Marketing Certificate

EXPERIENCE

UI Engineer, Stateryou (Remote) • Develop responsive mobile and web application interfaces using React Native, React.js, JavaScript, HTML5 , and CSS3 for startup's core product platform • Build and maintain reusable UI component library implementing design system specifications with focus on accessibility standards (WCAG compliance) and cross-browser compatibility • Translate Figma mockups into production-ready code, ensuring pixel-perfect implementation and optimal performance across devices • Collaborate with backend engineers and product team to integrate RESTful APIs , implement state management, and deliver seamless user experiences aligned with technical requirements • Conduct code reviews and usability testing sessions, iterating on features based on user feedback and performance analytics to improve conversion rates • Implement responsive design patterns and optimize front-end performance including load times, rendering efficiency, and mobile responsiveness • Participate in Agile sprint planning, technical discussions, and feature planning to architect scalable UI solutions for product roadmap	02/2025 - Present
Graduate Assistant, Sacred Heart University • Assisted instructors with course planning and student engagement initiatives, facilitating learning for 50+ students across multiple computer science courses • Led tutoring sessions and clarified technical concepts including data structures , algorithms, and web development to support diverse learning needs • Evaluated student assignments and provided constructive feedback to enhance understanding and improve code quality , contributing to a 15% improvement in average class performance • Encouraged peer collaboration and built supportive learning environment through organized study groups and office hours	05/2024 - 07/2024

PROJECTS

Portfolio (CTO Of Starteryou) • Designed and developed responsive portfolio site using React with modern glass-morphism UI featuring frosted-glass card effects and vibrant gradient backgrounds (coral pink to sky blue) • Built interactive components with smooth hover animations and integrated professional sections for position, contact, and resume with mobile-first responsive design	
Popnwrap (E-Commerce Site) • Built a full-stack e-commerce platform with user authentication, shopping cart functionality using local storage, and integrated Stripe API for secure payment processing • Created admin dashboard for product management and developed responsive design using React, Node.js, MongoDB with RESTful API architecture	
Art Gallery Management System • Developed a UI for organizing and displaying gallery artworks with user signup/authentication system and visual catalog featuring filtering and categorization capabilities • Implemented responsive design for cross-device accessibility using React with modern component architecture and state management
